Executive Summary

This report provides a demographic, economic, and educational profile of Workforce Investment Area IX (WIA IX), Capital Area. The purpose of these profiles is to assist on-going strategic planning efforts by providing a solid, data-driven, foundation for strategic decision-making. The primary findings from this report are:

- Between 2000 and 2010, WIA IX will experience a major increase in its 55 and over population. The net result of this trend will be a significant “graying” of the overall population.
- One implication of this trend is that younger entry-level workers will be in short supply.
- WIA IX is experiencing, and will likely continue to experience, increased employment in Services and Retail Trade.
- One implication of this is that the Service sector – specifically, health care and education – is expected to account for much of the demand for trained workers between 1998 and 2008.

I. Introduction

This report provides a community profile of Workforce Investment Area IX (WIA IX). It was produced by the Virginia Employment Commission, with assistance from the Virginia Community College System and the Virginia Economic Development Partnership, at the request of the Special Advisor to the Governor for Workforce Development. It is intended to assist on-going strategic planning efforts within the Workforce Investment Boards by providing a solid, data-driven, foundation for strategic decision-making.

The report is divided into four major sections. The first contains a profile of regional demographic characteristics and trends, the second supplies similar information for the regional economy, and the third provides a profile of regional education characteristics and projected demands for training and skills. These are followed by a summary and conclusion section.

II. Demographic Profile

Population demographics are the single most important factor affecting WIA IX's future labor force. Some key features of the area's population are as follows:

- Smaller proportion of minorities. Where statewide minorities comprise 28 percent of the overall population, in WIA IX they comprise 25 percent of the population.
- Projected to increase by 119,488 persons (or 18.9 percent) between 2000 and 2010. The largest increase is expected in Chesterfield County (56,097), followed by Henrico County (38,700) and Hanover County (19,680).
- Smaller proportion of individuals who "speak English less than well". Where statewide the proportion of individuals five and older who speak English less than well is 2.2 percent, in WIA IX it is 1.3 percent.
- Henrico County draws the largest number of in-commuters (75,380) of any locality within WIA IX, followed by Chesterfield County (39,740) and Hanover County (19,494). A large number of Henrico and Hanover counties', and the majority of Chesterfield County's, in-commuters come from outside WIA IX. On the whole, WIA IX is a net exporter of workers with 71,322 individuals commuting into the area for work, while 114,136 of the area's residents commute to localities outside of WIA IX for work.

1. Empty cells within the table indicate that the area's commuting represents less than .2% of total commuting or may be zero.
2. Total Commuting to/from WIA= Other VA Localities + Out of State

Example of how to use the Commuting Patterns table:

"How many of Chesterfield's residents commute to Charles City County?" On the horizontal or To axis, locate the column labeled Charles City. On the vertical or From axis, locate the row labeled Chesterfield. The intersection of the row and column, 63, is the number of Chesterfield's residents that commute to Charles City County.

Commuting Patterns¹

	Total From County/ City To WIA IX	Other VA Localities	Out of State	Total From County/C ity:	Total In State	Total Out of State

III. Economic Profile

Where population demographics provide information on underlying trends within the labor force, economic data provides more detailed information on the likely demand for specific types of workers. Some key features of WIA IX's economy are as follows:

- Unemployment rates are consistently below the statewide average. In 2002, WIA IX's unemployment rate was 3.2 percent, 0.9 percent above the statewide average of 4.1 percent.
- Employment is concentrated in Retail Trade (14.2 percent), Government (12.4 percent), Finance/Insurance (9.1 percent), and Health Care (8.8 percent).
- Most recent new hires have been in Retail Trade (38.3 percent), Services (31.8 percent), and Construction (11.6 percent).
- Overall personnel turnover is below the statewide average (12.3 percent vs. 13.2 percent). Personnel turnover tends to be highest in Agriculture, Forestry, and Fishing (15.5 percent), followed by Retail Trade (14.9 percent), Construction (14.6 percent), and Services (14.1 percent).
- Weekly wages were highest in Management (\$1,218), followed by Utilities (\$1,172), Finance/Insurance (\$1,110), Wholesale Trade (\$971), and Federal Government (\$965).
- Industries with the largest proportion of workers at or near retirement age (55 and above) are Manufacturing (14.2 percent), Wholesale Trade (14.1 percent), Services (13.5 percent), Mining (13.0 percent), and Construction (12.4 percent).
- Employment projections indicate that between 1998 and 2008, most employment growth will occur in Services (62,429 additional jobs), Retail Trade (16,127 additional jobs), and Finance, Insurance, and Real Estate (15,860 additional jobs). In contrast, Manufacturing is projected to lose 1,627 jobs, and Federal Government 1,083 jobs.
- Employment projections also indicate that between 1998 and 2008, the biggest growth in occupational employment will be in Systems Analysts (3,010 openings), Adjustment Clerks (2,050 openings), Computer

Support Specialists (1,840 openings), Home Health Aides (1,770 openings), and Bill and Account Collectors (1,480 openings). Alternatively, the biggest declines in occupational employment will be in Private Child Care Workers, Peripheral EDP Equipment Operators, and Printing Film Strippers.

- Based on January 2004 Unemployment data, the largest pools of available workers are in the Office and Administrative Support, Management, Sales, and Construction and Extraction occupations.

Source: Industry and Occupational Employment Projections, 1998 — 2008. OES Occupational Wage Data
Projections data is for the Richmond-Petersburg MSA. Wages are for WIA IX.

Characteristics of the Unemployed

Marketing the local labor force to new or expanding companies requires information about potential employees that would be available for immediate hire. Monthly data, collected as unemployed individuals apply for unemployment insurance benefits, provide information on various characteristics of the unemployed claimants. Demographic characteristics are recorded for age, race, sex, and education level. In addition, the industry of last employment and the occupation held in the most recent job is also part of the information collected when applicants register for unemployment insurance benefits.

As seen in the chart below, 39% of the unemployed claimants in Capital Area have a grade 12 education level, compared to 41% of claimants statewide. However, for every level of education from Associates degree and higher, Capital Area has a higher percentage of unemployed claimants than the state. Capital Area has 5,924 unemployed claimants with at least an Associates degree, while many other regions of the state have a much smaller ratio of claimants with post-secondary education.

Unemployed Claimants by Education Level

Characteristics of the Unemployed

Office and Administrative Support workers comprise the largest category of unemployed beneficiaries in Capital Area, accounting for almost 19% of total claimants in February 2004. Management and Sales and Related workers also account for a significant share of the unemployed claimants, collectively representing over 22% of the total. Employers requiring workers in these occupation categories will find an abundant supply.

Claimants by Occupation

IV. Education Profile

Education data describe the human capital embodied in the current labor force and provide insight into the education and training that will be required to fill the ranks of the future labor force. Some key features of the WIA IX's education and training environment are as follows:

- Educational attainment at the baccalaureate level and above is above the statewide average.
- An assessment of the occupation-driven demand for local training needs indicates that between 1998 and 2008 the greatest demand for graduates from:
 - *Post-secondary vocational programs* will be in Administrative Assistant and Secretarial Science, Auto Mechanic/Technician, Computer Systems Installer and Repairer, Cosmetologist, and Licensed Practical Nursing.
 - *Associate's degree programs* will be in Information Sciences and Systems, Management Information Systems and Business Data Processing, Paralegal, and Registered Nursing.
 - *Baccalaureate degree programs* will be in Accounting; Child Care and Guidance Workers/Managers; Computer and Information Sciences; Electrical, Electronics, and Computer Engineering; Elementary Teacher Education; General Education; General Finance; Human Resources Management; Information Sciences and Systems; Insurance Marketing; Investments and Securities; Management Information Systems and Business Data Processing; Physical Education and Coaching; and Purchasing, Procurement, and Contracts Management.
- An assessment of the occupation-driven demand for worker skills indicates that between 1998 and 2008 there will be a slight increase in required *writing* skills.

Education Level

Population 25 years and over	442,909
High school graduate (includes equivalency)	113,284
Some college, no degree	102,149
Associate's degree	25,698
Bachelor's degree	95,320
Graduate or professional degree	45,983

Occupation-Driven Training Projection

In this section we use Virginia Employment Commission's (VEC's) occupational employment projections for the Richmond-Petersburg Metropolitan Statistical Area (MSA),¹ in combination with a crosswalk developed by the National Crosswalk Service Center (NCSC) to "map" occupations into their prerequisite education and training programs.² Often these are many-to-many relationships where one occupation maps into several alternative education and training programs, and one program serves as a conduit into multiple occupations. The analysis is then further refined by using a classification scheme developed by the Bureau of Labor Statistics (BLS) to "sort" occupations according to the minimum degree or award typically required for employment in that occupation.³ Through this combination of steps, we are able to use VEC's occupational employment projections to predict the occupation-driven demand for specific education and training programs within the Richmond-Petersburg MSA.⁴ The method used to accomplish this task is not new and has been successfully employed in earlier studies conducted in several states, including Virginia.⁵

The table that follows depicts the annual occupation-driven demand for training needs in the Richmond-Peters-

burg MSA for the 1998 to 2008 period, as derived from this analysis. As these data show, the largest numbers of needed graduates are in auto repair (*e.g.*, Auto/Automotive Mechanic / Technician), business (*e.g.*, Accounting; Business Administration and Management; General Finance; Human Resource Management; Insurance Marketing Operations; Investment and Securities; Purchasing, Procurement, and Contracts Management), clerical (*e.g.*, Administrative Assistant/Secretarial Science), computer technology (Business System Networking and Telecommunications, Computer Programming, Computer and Information Sciences, Information Sciences and Systems, Management Information Systems and Data Processing), education (*e.g.*, Elementary Teacher Education, General Education, and Physical Education Teaching and Coaching), engineering (*e.g.*, Civil Engineering, Electrical/Electronic and Communication Engineering, Engineering and Industrial Management), government (*e.g.*, Public Administration), health (*e.g.*, Medicine (MD), Registered Nurse, and Licensed Practical Nurse), law (*e.g.*, Law (LLB, JD) and Paralegal/Legal Assistant), and services (*e.g.*, Cosmetologist).

¹ The Richmond-Petersburg Metropolitan Statistical Area is comprised of Charles City, Chesterfield, Dinwiddie, Goochland, Hanover, Henrico, New Kent, Powhatan, and Prince George's counties and the cities of Colonial Heights, Hopewell, Petersburg, and Richmond.

² The National Crosswalk Service Center (NCSC) is funded by the U.S. Department of Labor, Employment and Training Administration. This crosswalk identifies the prerequisite instructional programs necessary for employment in 651 specific occupations.

³ The Bureau of Labor Statistics classifies occupations according to eleven education and training categories. Four of these involve on-the-job training or work experience only and the remaining seven require some level of postsecondary education (*i.e.*, first-professional degree, doctoral degree, master's degree, bachelor's degree, associate's degree, or postsecondary vocational training). For purposes of this study, we restrict the analysis to occupations that fall within these seven education and training categories.

⁴ More formally, the demand for education and training programs is calculated as:

$$DCIP_i = \sum Dcip_{ji}$$

Where,

$$Dcip_{ji} = (SOC_j)(GCIPI_i / \sum Gcip_{ij})$$

and,

$DCIP_i$ = the annual demand for instructional program i

$\sum Dcip_{ji}$ = the annual demand for instructional program i across all occupation(s) j

SOC_j = the projected annual openings for occupation j

$GCIPI_i$ = Virginia graduates from instructional program i (for academic year 2000-01)

$\sum Gcip_{ij}$ = Virginia graduates from all instructional program(s) i (for academic year 2000-01) related to occupation j

⁵ Similar methods are used in at least seven states (California, Georgia, Idaho, Illinois, New Jersey, Utah, and Virginia) to project anticipated education and training demands. For an excellent exposition of this method see, William J. Drummond and Jan L. Youtie, "Occupational Employment, Demand for College Graduates, and Migration: A Statewide View," a report to the Board of Regents, University System of Georgia, 1999. For an example of how this method has been used previously in Virginia see, A. Fletcher Mangum, "System-Wide Needs Assessment for Virginia Education," State Council of Higher Education for Virginia, March 28, 2002, p.90.

Work Skills Projection

In this section we use the VEC's occupational employment projections for the Richmond MSA, in combination with occupational skills profiles developed by ACT,¹ to identify the skill sets that will be required to fill projected annual job openings within the region. The skills categories addressed in this analysis are Applied Mathematics, Applied Technology, Listening, Locating Information, Observation, Reading for Information, Teamwork, and Writing. A description of each category, the skills levels associated with it, and the proportion of projected annual job openings that fall within each skill level follow.

Applied Mathematics

The *Applied Mathematics* assessment measures a person's skill in using mathematical reasoning to solve work-related problems. ACT defines the skills levels associated with this category as follows.

Level 3:

- Perform basic mathematical operations using whole numbers and decimals.
- Convert a number from one form into another using whole numbers, fractions, decimals, or percentages.
- Solve problems that are straightforward, involving a single type of mathematical operation.
- Translate easily from a verbal setup to a mathematical equation when all the information needed to solve the problem is provided in logical order and no unrelated information is included.

Level 4 (in addition to requirements for previous levels):

- Perform one or two mathematical operations using several positive or negative numbers.
- Add commonly known fractions, decimals, or percentages, or add three fractions that share a common denominator.
- Calculate averages, simple ratios, proportions, and rates, using whole numbers and decimals.

- Reorder verbal information before performing calculations.
- Determine which operations to perform and in what order.
- Read a simple chart or graph to obtain the information needed to solve a problem.

Level 5 (in addition to requirements for previous levels):

- Look up and calculate single-step conversions within English or non-English systems of measurement or between systems of measurement.
- Calculate using mixed units and several steps of logic.
- Calculate perimeters and areas of basic shapes.
- Calculate percentage discounts and markups.
- Determine what information, calculations, and unit conversions are needed to find a solution.

Level 6 (in addition to requirements for previous levels):

- Calculate using negative numbers, fractions, ratios, percentages, and mixed numbers.
- Calculate multiple rates for comparison or use in other calculations.
- Find basic areas and volumes of rectangular solids.
- Identify and correct errors in calculations.
- Solve problems involving considerable setup and multiple-step calculations or conversions.

Level 7 (in addition to requirements for previous levels):

- Calculate using multiple steps of logic.
- Calculate multiple areas and the volumes of spheres, cylinders, and cones.
- Solve problems with more than one unknown.
- Solve problems involving nonlinear functions, such as rates of change.

¹ The occupational skills profiles used in this analysis were provided by ACT. ACT is an independent, non-profit organization that specializes in research and assessment related to education and work. These profiles are based on actual ACT *WorkKeys* assessments of thousands of employed individuals nationally. They represent the most comprehensive and current measure of the work skills required for specific occupations.

- Calculate by applying basic statistical concepts.
- Derive information needed to solve problems if incomplete or implicit information is presented.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Applied Mathematics* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 3 *Applied Mathematics* skills.

Proportion of Jobs in the Richmond MSA by Required Skill Level – Applied Mathematics

Annual Openings in the Richmond MSA by Required Skill Level – Applied Mathematics

Applied Technology

The *Applied Technology* assessment measures a person's skill in using the basic principles of mechanics,

electricity, fluid dynamics, and thermodynamics to solve problems with machines, equipment, and structures found in the workplace. ACT defines the skills levels associated with this category as follows.

Level 3:

- Understand the operation of basic hand tools, simple machine components, and uncomplicated systems, such as piping systems, simple electrical heaters, or other equipment found in the home, school, or workplace.
- Apply elementary principles underlying the operation of physical systems, such as the workings of plumbing components or simple electrical systems.

Level 4 (in addition to requirements for previous levels):

- Understand the operation of moderately complex tools, machines, and systems, such as appliances, pulley-driven equipment, or piping systems that carry more than one fluid.
- Apply elementary principles underlying the operation of physical systems, such as a block and tackle or cooling fins.

Level 5 (in addition to requirements for previous levels):

- Use the basic principles of mechanics, electricity, thermodynamics, and fluid dynamics in moderate and advanced applications.
- Understand complex machines and systems, such as the operation of gasoline engines, complex appliances, or an electrical system in a building.

Level 6 (in addition to requirements for previous levels):

- Use principles of mechanics, electricity, thermodynamics, and fluid dynamics interacting in advanced applications such as air conditioning units.
- Troubleshoot complex systems in which a variety of mechanical, electrical, thermal, or flow faults are potential sources of difficult problems.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Applied Technology* skills level, as determined by the ACT occupation skills profiles. The second figure provides a

similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 3 *Applied Technology* skills. The large “Not Profiled” proportion indicates that ACT has not profiled many of these occupations with respect to *Applied Technology* skills. As a result, it is not possible to include them in the analysis.

Proportion of Jobs in the Richmond MSA by Required Skill Level – Applied Technology

Annual Openings in the Richmond MSA by Required Skill Level – Applied Technology

Listening

The *Listening* portion of the *Listening and Writing* assessment measures a person’s skill in listening to and conveying information. ACT defines the skills levels associated with this category as follows.

Level 1:

- Write down a small amount of useful information based on a spoken communication.

- Give clues to the gist of the situation or provide sources of further information, but do not include enough information to give the receiver a correct understanding of the situation described in the message.

Level 2 (in addition to requirements for previous levels):

- Correctly write down the basic ideas of a spoken message.
- Give a fair amount of useful information, but may miss some of the important details or incorrectly record some of the information.

Level 3 (in addition to requirements for previous levels):

- Listen to a spoken communication and record messages that are basically correct.
- Present all the primary details and the relationships among them correctly, but may miss one or two pieces of important information.

Level 4 (in addition to requirements for previous levels):

- Accurately convey the central idea of a spoken communication.
- Correctly record all the important information and the relationships among pieces of information, but may miss or incorrectly record some details or include irrelevant information.

Level 5 (in addition to requirements for previous levels):

- Correctly record all the important information and the relationships among pieces of information from a spoken communication.
- Use supporting details to convey insight into the particular situation the message involves.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Listening* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 3 and Level 4 *Listening* skills.

Proportion of Jobs in the Richmond MSA by Required Skill Level – Listening

Annual Openings in the Richmond MSA by Required Skill Level – Listening

Locating Information

The *Locating Information* assessment measures a person's skill in using workplace graphics such as diagrams, floor plans, tables, charts, graphs, forms, and instrument gauges. ACT defines the skills levels associated with this category as follows.

Level 3:

- Find one or two pieces of information in a graphic.
- Fill in one or two pieces of information that are missing from a graphic.

Level 4 (in addition to requirements for previous levels):

- Find several pieces of information in graphics.

- Summarize and/or compare information and trends in a single graphic.
- Summarize and/or compare information and trends among more than one graphic by determining the relationships among the graphics.

Level 5 (in addition to requirements for previous levels):

- Summarize and/or compare information and trends in a single graphic.
- Sort through distracting information to summarize and/or compare information and trends presented in more than one workplace graphic.

Level 6 (in addition to requirements for previous levels):

- Draw conclusions from the information presented in very detailed graphics.
- Apply information from these types of graphics to specific situations.
- Analyze data within these types of graphics to make decisions and/or predictions requiring judgments based on the information presented.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Locating Information* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the vast majority of jobs will require workers with Level 4 *Locating Information* skills.

Proportion of Jobs in the Richmond MSA by Required Skill Level – Locating Information

Annual Openings in the Richmond MSA by Required Skill Level – Locating Information

Observation

The *Observation* assessment measures a person's skill at noticing details and paying attention to instructions and demonstrations. The following is a description of the skills levels associated with this area.

Level 3:

- Pay attention.
- Watch and listen to a strongly cued demonstration or set of instructions.
- Recall a few strongly reinforced details of a process or procedure.

Level 4:

- Sustain focused attention on the demonstrated instructions, process, or procedures.
- Select and attend to important details.
- Recall a few important, moderately reinforced details about the demonstrated process or procedure.

Level 5:

- Focus attention on and recall several important aspects of the information presented.
- Ignore irrelevant background information through selective attention to important details.
- Maintain attention to detail.
- Recall several important details about unfamiliar material.

Level 6:

- Notice and remember several details that are relevant to the process or procedure being shown.
- Take in and recall incoming sensory information so it can be used to make predictions, comparisons, or evaluations.
- Visualize how a detail or task fits into the entire process or procedure demonstrated.
- Interpret if-then and cause-effect relationships.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Observation* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 4 *Observation* skills.

Reading for Information

The *Reading for Information* assessment measures a person's skill in reading and using work-related information including instructions, policies, memos, bulletins, notices, letters, manuals, and governmental regulations. ACT defines the skills levels associated with this category as follows.

Level 3:

- Identify uncomplicated key concepts and simple details.
- Recognize the proper placement of a step in a sequence of events, or the proper time to perform a task.
- Identify the meaning of a word that is defined within the document.

- Identify the meaning of a simple word that is not defined within the document.
- Recognize the application of instructions given in the document to situations that are also described in the document.

Level 4:

- Identify important details that are less obvious than those in Level 3.
- Recognize the application of more complex instructions, some of which involve several steps, to described situations.
- Recognize cause-effect relationships.
- Determine the meaning of words that are not defined in the document.

Level 5:

- Identify the paraphrased definition of a technical term or jargon that is defined in the document.
- Recognize the application of technical terms or jargon to stated situations.
- Recognize the definition of an acronym that is defined in the document.
- Identify the appropriate definition of a word with multiple meanings.
- Recognize the application of instructions from the document to new situations that are similar to those described in the document.
- Recognize the application of more complex instructions to described situations, including conditionals and procedures with multiple steps.

Level 6:

- Recognize the application of jargon or technical terms to new situations.
- Recognize the application of complex instructions to new situations.
- Recognize, from context, the less common meaning of a word with multiple meanings.
- Generalize from the document situations not described in the document.
- Identify implied details.

- Explain the rationale behind a procedure, policy, or communication.
- Generalize from the document to a somewhat similar situation.

Level 7:

- Recognize the definitions of difficult, uncommon jargon or technical terms, based on the context of the reading materials.
- Figure out the general principles underlying described situations and apply them to situations neither described in nor completely similar to those in the document.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Reading for Information* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 4 *Reading for Information* skills.

Proportion of Jobs in the Richmond MSA by Required Skill Level – Reading for Information

Annual Openings in the Richmond MSA by Required Skill Level – Reading for Information

Teamwork

The *Teamwork* assessment measures a person's skill in choosing behaviors and/or actions that simultaneously support relationships within a team and lead toward the accomplishment of work tasks. The following is a description of the skills levels associated with this area.

Level 3:

- Identify team goals and ways to work with other team members to accomplish team goals.
- Recognize that a team is having problems finishing a task and identify the cause of those problems.
- Choose actions that actively support the ideas other team members have for accomplishing team goals.
- Recognize the need for trust and dependability in a team environment.

Level 4:

- Identify the organization of tasks and the time schedule that would help the team reach goals efficiently, creatively, and effectively.
- Select approaches that accept direction from other team members in order to complete tasks and to build and keep up good team relations.
- Identify behaviors that show appreciation for the personal and professional qualities of other team members and respect for their diversity.
- Recognize the need for commitment to quality and sensitivity to customers while pursuing the team goal.

Level 5:

- Identify courses of action that give direction to other team members.
- Determine the best use of team talents to accomplish goals.
- Choose approaches that encourage other team members to improve relationships and/or complete tasks.
- Consider and evaluate the possible effects of alternative behaviors on both team relationships and the completion of tasks.

Level 6:

- Identify the focus of team activity and select a new focus if that would help the team meet its goals more effectively.
- Select approaches that show a willingness to give and take direction, as needed, to further team goals (e.g., recognize the organization of team members' tasks that would best serve the larger goals of the team).
- Choose approaches that encourage a team to act as a unit and reach agreement when discussing specific issues.
- Identify actions that would help manage differences of opinion between team members, moving the team toward its goals while valuing and supporting individual diversity.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Teamwork* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 4 *Teamwork* skills.

Proportion of Jobs in the Richmond MSA by Required Skill Level – Teamwork

Annual Openings in the Richmond MSA by Required Skill Level – Teamwork

Writing

The *Writing* portion of the *Listening and Writing* assessment measures a person's skill in writing work-related messages. ACT defines the skills levels associated with this category as follows.

Level 1:

- Write messages in English that contain a large number of major grammatical, punctuation, spelling, and/or other mechanical errors making the messages very unclear and inconsistent with standard business English.

Level 2:

- Write messages that are generally understandable, but contain many errors in grammar, punctuation, and/or sentence structure making these messages somewhat difficult to comprehend.

Level 3:

- Write messages that are clear, but may include some incomplete sentences and/or errors in grammar and punctuation.

Level 4:

- Write messages that are clear and generally consistent with standard business English, but may contain a few minor errors in grammar and punctuation, and/or the writing style may lack clear organization and appropriate transitions.

Level 5:

- Write messages that are clear and highly consistent with standard business English.
- Use good sentence structure with a smooth, logical style and no mechanical errors.

The following figure details the percentage of overall jobs in the Richmond MSA in 1998 and 2008 by required *Writing* skills level, as determined by the ACT occupation skills profiles. The second figure provides a similar breakdown for projected annual job openings between 1998 and 2008. These data show that the majority of jobs will require workers with Level 3 and Level 4 *Writing* skills.

V. Summary and Conclusions

Population trends in WIA IX, as in other parts of the United States, are currently dominated by the aging of the baby-boom generation. Between 2000 and 2010 this demographic phenomena will cause a major increase in the 55 and over population within the region. The net result of this increase will be a significant “graying” of the overall population.

One implication of this is that younger entry-level workers will be in short supply. This should elevate the importance of workforce services in facilitating the efficient and effective use of existing labor resources by getting younger trained workers into the workforce, and retraining or upgrading the skills of older displaced workers.

Another significant trend within WIA IX has to do with increasing employment in Services. It can be anticipated that employment increases in the Service sector – specifically, health care and education – will drive much of the demand for trained workers between 1998 and 2008.
